

Kinetic Wellness First Aid Project

Haiti has been the subject of intense public health efforts even before the earthquake, and the recent natural disaster has exposed a healthcare system in disarray. Victims are at risk of having minor injuries become life-threatening if left untreated, and those that did survive will have to deal with the psychological trauma along with their physical injuries.

To fulfill the requirements of the assignment, your group must complete the following three sections:

- I. Research the topic and determine if it was a major medical issue before the earthquake and if it is an area of concern after the earthquake.
- II. Describe how the topic might apply to a potential situation in your lives.
- III. Find an organization or project related to your topic and provide a description of what is being done to assist Haiti after the earthquake.

Your group will be given three days to research your topic, plan your presentation, and design a poster to accompany the presentation. When planning your presentation and poster design, use the following points as a guide when meeting the three requirements above.

- an explanation of your topic including signs/symptoms
- proper treatment or care
- at least 2 graphics (picture, chart, etc.)
- at least 2 resources

Your grade will be based on the following:

Presentation

All group members participate - 4 pts. _____

Requirements for all three sections fulfilled - 18 pts. _____

Use of poster - 3 pts. _____

Poster

Explanation of the topic - 4 pts. _____

Treatment/care - 4 pts. _____

Graphics - 2 pts. _____

Resources - 2 pts. _____

Creativity/Display - 3 pts. _____

TOTAL _____ 40 pts
